RULES AND REGULATIONS DUAL POLE SIGN

Dual pole signs are doubled-faced, use plastic pan-formed faces and are retained by the new *Modular Reface Mounting System*.

HIERARCHY

- The fuel brand sign is at the top of the sign system.
- Between the fuel brand sign and the price sign:
 - No more than one 3X and on 2X sign are allowed above the price sign.
 - Marketer name or approved QSR (in their design, colors and fonts) may be displayed in a 3X or 2X sign.
 - If both the Marketer and QSR signs must appear above the QSR in a 3X or 2X sign and the QSR must be in a 2X sign.
 - If two approved QSRs are desired, then they may be displayed side-by-side in one 3X or 2X sign or in two 2X signs with one QSR in each. No more than two QSRs may be displayed above the price sign.
 - If a Marketer name or QSR sign doesn't appear above the price sign, then a 3X or 2X red blank may be positioned above the price sign.
 - You are not required to put anything between the fuel brand sign and the price sign.
- It is strongly recommended the top price sign not exceed 18' above grade for manually-changeable fonts.
- The following items may be placed below the price sign, if desired:
 - Service signs, such as ATM, Diesel, Car Wash, etc in 1X using standard white fonts on Oasis Red Background. There is no limit to these other services as long as they meet local sign codes.
 - A Readerboard may be placed at the very bottom of the system in 3X or 2X.
- If there is a business need for a gap in the sign system, the gap must be at least 6' or more.

Signature (Order must be signed)
