REPORT OF INVESTIGATION

Structural issues are apparent walking around the exterior of the building. The west wall of the house where the brick fell off still has exposed wood and is being held in place by temporary wood braces. Some of the existing bricks are showing signs off crumbling. In addition to the attached photos taken by myself, I have included photos taken on July 8, 2021 by the City's former Building Official, Jeremy Ogden, which show impaired structural conditions including an interior wall being held in place with a ratchet strap. Also, there are several electrical issues including numerous areas with open boxes, hanging wires and romex. Due to the dangerous conditions existing, this structure can not safely be occupied.
